Jennifer, I will review and get back to you.

There is 10-15 minutes for EPA and NOAA combined to present. There will also be 15 minutes of Q&A free-for-all, so you'll probably get lots of questions then, unless you don't.

Josh

Hi Jeff, I'm not sure. Josh? Also, I just talked over the presentation with John, and we'll be sticking to the same bullets as what I sent to you. They'll just be more brief. John's pulling together a ppt, so hopefully, we can send that to you all soon.

Josh, FYI on the talking points. And again, let us know how we should be talking about it. How's this: we support the findings that a riparian rule is needed.

Hi,

Do you know if you are getting 5-6 minutes and we get same, or are we sharing your 5-6 minutes if we go?

Thanks!

Jeff Lockwood

Thanks for the draft presentation, Josh. We're ready to talk on the following points in the 5-6 minutes at the EQC meeting. Briefly, that's:

- Overall support for findings behind the need for a riparian rule
- Reiterating importance of cold water for fish as in the temperature guidance development
- Importance of PCW in EPA's approval of WQS and the numeric criteria

Jeff, we're going to adjust our talking points. John, FYI, on what DEQ and ODFW are covering. We can touch base when you have time.

Here is the draft presentation as it is currently. The Mid Coast TMDL and comparison of states at the end needs doing and overall it needs to be shortened, but you get the idea. This

should help with knowing what DEQ and ODFW are covering.

Thanks,

Josh
